

Quantum Waste. Environmental Policy

Date: 1st Feb 2014

Quantum Waste is committed to leading the industry in minimising the impact of its activities on the environment. Quantum Waste recognizes that its success is linked to its ability to provide sustainable and environmentally friendly waste management solutions to its partners and customers.

The key points of its strategy to achieve this are:

- Utilize technology to improve current waste management practices.
- Minimize waste by evaluating operations and ensuring they are as efficient as possible.
- Actively promote recycling both internally and amongst its customers and suppliers and to reduce pollution.
- Source and promote a product range to minimize the environmental impact of both production and distribution.
- Meet or exceed all the environmental legislation that relates to the Company.
- Comply with relevant environmental legislation, regulation and industry codes of practice.
- Provide for the publication of the Environmental Policy internally, by posting the document in the Company and externally to all interested parties, on request.
- Provide for the setting and achievement of environmental objectives and targets for the Company, and secondly for the publication of the environmental objectives and targets by the posting of the document in the Company.
- Maintain efforts to achieve continual improvement in the environmental performance of the Company, the starting point is to comply fully with the requirements of ISO14001:2004.
- Foster openness, dialogue and discussion with employees, customers, suppliers, contractors and all interested parties regarding the environmental performance and the environmental objectives and targets of the Company.
- Measure environmental performance by conducting regular environmental audits and assessments of compliance with the Environmental Policy, relevant environmental legislation and the requirements of the Company.
